

Z is for Zoo Alphabet Bingo

As you visit Wildlife World Zoo, Aquarium and Safari Park today keep track of the different animals you see. Cross off the letters as you find an animal that's name starts with each letter. If appropriate, students should write the name of the animal in the corresponding letter square. Students should find an animal for every square of there bingo board if possible during their visit.

Depending on age level of the students, find other ways to play the game. Consider using the letters to find different countries/bodies of water the animals come from in the wild to look at species diversity within the zoo, finding scientific species names that start with each letter, an animal adaptation for the letters, or a threat to species that begins with the letters.
